

Job Description – Web developing football project

Department:

Data-science

Report to:

Head of Data Science

Company profile:

FACTS is a start-up that provides data consultancy to European player agents and represents foreign players that want to make a move to the Dutch national football competition. With our services we give answers to questions like: which clubs are interesting for a certain player, what value does a player represent and other data related football questions. In the first two years of its existence, FACTS acquired over 70 partners in most European countries, and lately we are working with clubs for our services.

Job purpose:

One of the main services that we provide for clubs is our Present Your Player platform. On that platform, clubs and player agents come together to make the transfer process smoother, better organised, and data-based. The first version of the platform launched in June 2022. Lately we have worked with a UX/UI designer for the designs of the 2.0 version. With our designer, head of Data Science, and lead developer, you will be building the new platform.

Tasks and Responsibilities:

- Make sure the designs for the new version of the platform are applicable
- Translate the designs to the actual platform
- Program the designs

Qualifications:

We are looking for someone that wants to get some more experience in the football industry or front-end development. So, are you studying and have some time free? Do you have a gap year and looking for a kickstart of your career? Then this would be the perfect job for you. This could be on a project-basis but there are also possibilities to stay for the long term.

- Experienced in HTML, JavaScript, and CSS
- Basic PHP knowledge
- Fluent in English and/or Dutch
- Neat and structured work ethic
- Solution oriented person

What we offer:

- Fun, dedicated and young team
- Flexible working hours
- Room for your ideas and contributions
- A football environment to develop your personal skills and ambitions
